Architectural modeling and visualization 2021
- Knower School Certificate
Creation of 3D graphics for computer games
2022

ABOUT ME

One of my favorite areas is the sci-fi theme, a combination of techno and bionics.

I like to draw, as well as to model futuristic locations, display my vision of the worlds, conveying a certain mood and detail as much as possible. All my conceptual creative projects are made in this style.

I do photography and travel - nature inspires and helps me find solutions to hone my creative skills and abilities through digital art.
